

Cameron

Work experience- Local pub

Cameron has worked with staff to travel on the bus independently. Although staff are with him for these journeys' they say that Cameron is able to travel independently on the bus.

Cameron told us:

“ I feel pretty chilled. I know what I am doing. ”

Cameron would like to work in a cinema and visit the cinema independently!

Cameron has ASD and can find times of transition and change quite difficult, which can cause him to feel anxious and concerned. In his first year he found it difficult to access the classroom and to socialise with peers. We developed strategies for him to better access the classroom and to build up his confidence. Through our Animal Assisted Therapy program and his own hard work, Cameron developed resilience and can now access the classroom, socialise independently and is also gaining work experience at his local pub.

Now, Cameron is more than willing to talk about his future..

He is excited about it!

Employer:

“ Cameron is hard working. He's a pleasure to be around. He works well in a team. ”
